Why is FAAM needed?

Asbestos still kills – there’s a real need for qualified professionals to minimise the risk.

FAAM’s aim is to help ensure asbestos practitioners can operate with the relevant levels of competency and expertise, so that the ongoing issues caused by asbestos can be reduced.

These key issues include:

- Asbestos still kills around 5,000 workers each year
- Around 20 tradesmen die each week as a result of past exposure
- The UK has one of the highest rates in the world of mesothelioma - a type of cancer linked to asbestos exposure
- Cancer Research UK stated there were over 2,500 deaths from mesothelioma in 2014 with 94% of cases being deemed preventable

Who is BOHS, and what is its role in FAAM?

BOHS, the British Occupational Hygiene Society, is the Chartered Society for Worker Health protection. BOHS has a long history of international leadership on protection against asbestos since the 1960s, and is therefore ideally placed to offer the benefits of its expertise. Regarded as the gold standard, BOHS industry-leading P400 series of qualifications in asbestos are trademarked, and are recognised by the HSE and UKAS.
WHAT IS FAAM?

FAAM is BOHS' Faculty of Asbestos Assessment and Management: its overarching aim is to provide a community for professionals in the asbestos industry.
