

Faculty of Occupational Hygiene Strategy 2021-2025

Mission

To provide leadership for the UK's occupational hygiene professionals

Aims

1. To continue to develop all levels of occupational hygiene practice, raising standards and accessibility.
2. To provide technical, scientific, and non-technical skills related tools, information and development for the occupational hygiene profession.
3. To provide validated tools to enable those who cannot access occupational hygiene professionals to secure better workplace health protection.
4. To provide leadership and an independent voice in matters that impact on occupational hygiene practice.
5. To work nationally and internationally in strategic partnerships to help secure better occupational hygiene practice.

Vision

That Occupational Hygiene services are accessible, high quality and provided by suitably qualified and capable individuals.

Strategic Aims 2021-2025

1. To set standards and benchmarks of practice for all engaged in occupational hygiene services and to work with the UK regulator and other stakeholders to promote them.
2. To support the professional development of members of the Faculty regardless of the stage of their career through review and development of curriculum and qualification provision.
3. To promote the value of the profession and Chartered membership through communication, campaigning, and enhanced design of the journey to qualification.
4. To support the development of Occupational Hygiene as a discipline, science, and career through work with Higher and Further Education partners.
5. To develop and enhance the technical and scientific base of the Society by investigating partnerships to provide research and technical insights and to share the benefits with members.
